

1 đề có 30 câu, đây là những câu có trong kho đề.

1. The one-month forward bid price for dollars as denominated in Japanese yen is_____.

	Yen: Spot and Forward (¥/\$)		
	Mid Rates	Bid	Ask
Spot	114.25	114.20	114.30
<i>Forward Rates</i>			
1 month	114.06	-20	-18
6 months	112.91	- 136	- 132
<i>Swaps</i>			
2 year	102.03	1232	1212
3 year	99.88	1452	1422

- A. – ¥20
- B. – ¥18
- C. ¥114.12/\$
- D. ¥114.00/\$

2. The following table shows the spot and forward bid-ask rates for the U.S. dollar/Vietnamese đồng (USD = VND 1.00) exchange rate as of April 5, 2024.

Period	Bid rate	Ask Rate
Spot	24,250	24,300
1 month	24,270	24,320
2 months	24,290	24,340
3 months	24,310	24,360
6 months	24,400	24,460
12 months	24,600	24,670

The spot mid-rate is 24,275, and the 12-month forward mid-rate is 24,635. Is the Vietnamese đồng trading at a forward premium or discount relative to the U.S. dollar?

- A. Forward premium
- B. Forward discount

- C. No premium or discount
- D. Not enough information

3. The following table shows the spot and forward bid-ask rates for the U.S. dollar/Vietnamese đồng (USD = VND 1.00) exchange rate as of April 5, 2024.

Period	Bid rate	Ask Rate
Spot	24,250	24,300
1 month	24,270	24,320
2 months	24,290	24,340
3 months	24,310	24,360
6 months	24,400	24,460
12 months	24,600	24,670

Which of the following maturities has the largest forward premium?

- A. 1-month
- B. 6-months
- C. 12-months
- D. 24-months

4. The following table shows the spot and forward bid-ask rates for the U.S. dollar/Vietnamese đồng (USD = VND 1.00) exchange rate as of April 5, 2024.

Period	Bid rate	Ask Rate
Spot	24,250	24,300
1 month	24,270	24,320
2 months	24,290	24,340
3 months	24,310	24,360
6 months	24,400	24,460
12 months	24,600	24,670

What is the annualized forward premium for the 12-month forward contract?

- A. 2.00%
- B. 1.48%
- C. 1.60%

D. 3.10%

5. Tuan Tran bought a 3-month British pound futures contract for \$1.4400/£ only to see the dollar appreciate to a value of \$1.4250 at which time he sold the pound futures. If each pound futures contract is for an amount of £62,500, how much money did Tuan Tran gain or lose from his speculation with pound futures?

A. £937.50 loss

B. £937.50 gain

C. \$937.50 loss

D. \$937.50 gain

6. Linh Nguyen is now speculating on the British pound (GBP). She believes the U.S. dollar (USD) will strengthen against the pound over the next 90 days. The current spot rate is £0.78/\$, and she has the choice between the following options:

Options	Strike rate	Premium
Long CAD/USD Futures	£0.80/\$	\$0.00035/\$\$
Short CAD/USD Futures	£0.80/\$	\$0.00058/\$\$

If the spot rate at the end of 90 days drops to £0.75/\$, what is Linh's net profit per dollar after accounting for the premium?

A. £0.05

B. £0.0465

C. £0.10

D. £0.05 + premium cost

7. Linh Nguyen is now speculating on the British pound (GBP). She believes the U.S. dollar (USD) will strengthen against the pound over the next 90 days.

The current spot rate is £0.78/\$, and she has the choice between the following options:

Options	Strike rate	Premium
Long CAD/USD Futures	£0.80/\$	\$0.00035/\$\$
Short CAD/USD Futures	£0.80/\$	\$0.00058/\$\$

Linh buys a put option on GBP with a strike price of £0.80/\$ and a premium of \$0.00035 per pound. What is her break-even price?

- A. £0.7965/\$
- B. £0.8035/\$
- C. £0.795/\$
- D. £0.805/\$

8. Linh Nguyen is now speculating on the British pound (GBP). She believes the U.S. dollar (USD) will strengthen against the pound over the next 90 days. The current spot rate is £0.78/\$, and she has the choice between the following options:

Options	Strike rate	Premium
Long CAD/USD Futures	£0.80/\$	\$0.00035/\$\$
Short CAD/USD Futures	£0.80/\$	\$0.00058/\$\$

If Linh Nguyen expects the U.S. dollar to appreciate against the British pound, which option should she buy?

- A. Put on GBP
- B. Call on GBP
- C. Both options are equally profitable
- D. Neither option is beneficial

9. The phase of the globalization process characterized by imports from foreign suppliers and exports to foreign buyers is called the:

- A. multinational phase.

- B. import-export banking phase.
- C. international trade phase.
- D. domestic phase.

10. The following data represents the balance of payments for Vietnam (in million VND) based on statistics from the State Bank of Vietnam (SBV).

Indicator (Million VND)	2020	2021	2022	2023
Goods, credit (exports)	5,120,000	6,050,000	6,890,000	7,450,000
Goods, debit (imports)	-6,430,000	-7,210,000	-7,980,000	-8,620,000
Services, credit (exports)	1,850,000	2,030,000	2,310,000	2,680,000
Services, debit (imports)	-2,250,000	-2,460,000	-2,810,000	-3,140,000
Primary income, credit	780,000	950,000	1,120,000	1,310,000
Primary income, debit	-1,150,000	-1,280,000	-1,490,000	-1,750,000
Secondary income, credit	2,650,000	2,910,000	3,250,000	3,580,000
Secondary income, debit	-180,000	-210,000	-250,000	-290,000

What is Vietnam's balance of services in 2023?

- A. -460,000 million VND
- B. -500,000 million VND
- C. -420,000 million VND
- D. -460 million VND

11. The following data represents the balance of payments for Vietnam (in million VND) based on statistics from the State Bank of Vietnam (SBV).

Indicator (Million VND)	2020	2021	2022	2023
Goods, credit (exports)	5,120,000	6,050,000	6,890,000	7,450,000
Goods, debit (imports)	-6,430,000	-7,210,000	-7,980,000	-8,620,000
Services, credit (exports)	1,850,000	2,030,000	2,310,000	2,680,000
Services, debit (imports)	-2,250,000	-2,460,000	-2,810,000	-3,140,000
Primary income, credit	780,000	950,000	1,120,000	1,310,000
Primary income, debit	-1,150,000	-1,280,000	-1,490,000	-1,750,000
Secondary income, credit	2,650,000	2,910,000	3,250,000	3,580,000
Secondary income, debit	-180,000	-210,000	-250,000	-290,000

What is Vietnam's total balance of goods and services in 2023?

- A. -1,630,000 million VND
- B. -1,500,000 million VND
- C. -1,650,000 million VND
- D. -1,560 million VND

12. Anh Viet is a currency speculator who enjoys 'betting' on changes in the foreign currency exchange market. Currently the spot price for the Japanese yen is ¥129.87/\$ and the 6-month forward rate is ¥128.53/\$. Anh Viet thinks the yen will move to ¥128.00/\$ in the next six months. Anh Viet should _____ to profit from changing currency values.

- A. buy yen
- B. buy dollars
- C. sell yen
- D. not enough information to answer this question

13. Quang Vu thinks that the U.K. pound will cost \$1.43/£ in six months. A 6-month currency futures contract is available today at a rate of \$1.44/£. If Quang Vu was to speculate in the currency futures market, and his expectations are correct, which of the following strategies would earn him a profit?

- A. Buy a pound currency futures contract.
- B. Sell a pound currency futures contract.
- C. Sell pounds today.
- D. Sell pounds in six months.

14. An investor borrows JPY 50,000,000 at an interest rate of 1.20% per annum and needs to repay the principal and interest in 180 days. The investor converts the borrowed Japanese yen (JPY) into Thai baht (THB) at a current spot rate of THB 0.28 = JPY 1.00, obtaining THB 14,000,000. The Thai baht is invested at an interest rate of 3.00% per annum (1.50% for 180 days). After 180 days, the investment grows to THB 14,210,000, and the investor converts it back to Japanese yen at the new spot rate of THB 0.29 = JPY 1.00. The final repayment amount for the Japanese yen loan is JPY 50,300,000. How much Japanese yen (JPY) does the investor receive when converting THB 14,210,000 at the new spot rate of THB 0.29 = JPY 1.00?

- A. JPY 48,800,000
- B. JPY 49,000,350
- C. JPY 49,000,345
- D. JPY 49,000,000

15. An investor borrows JPY 50,000,000 at an interest rate of 1.20% per annum and needs to repay the principal and interest in 180 days. The investor converts the borrowed Japanese yen (JPY) into Thai baht (THB) at a current spot rate of THB 0.28 = JPY 1.00, obtaining THB 14,000,000. The Thai baht is invested at an interest rate of 3.00% per annum (1.50% for 180 days). After 180 days, the investment grows to THB 14,210,000, and the investor converts it

back to Japanese yen at the new spot rate of THB 0.29 = JPY 1.00. The final repayment amount for the Japanese yen loan is JPY 50,300,000. How much must the investor repay in Japanese yen after 180 days, including interest?

- A. JPY 50,600,000
- B. JPY 50,300,000
- C. JPY 51,000,000
- D. JPY 49,800,000

16. An investor borrows JPY 50,000,000 at an interest rate of 1.20% per annum and needs to repay the principal and interest in 180 days. The investor converts the borrowed Japanese yen (JPY) into Thai baht (THB) at a current spot rate of THB 0.28 = JPY 1.00, obtaining THB 14,000,000. The Thai baht is invested at an interest rate of 3.00% per annum (1.50% for 180 days). After 180 days, the investment grows to THB 14,210,000, and the investor converts it back to Japanese yen at the new spot rate of THB 0.29 = JPY 1.00. The final repayment amount for the Japanese yen loan is JPY 50,300,000. Did the investor make a profit or loss from this arbitrage trade?

- A. Profit of JPY 500,000
- B. Loss of JPY 1,300,000
- C. Break-even (no profit, no loss)
- D. Profit of JPY 700,000

17. What is the maximum profit the writer of the put option can earn per CHF?

- A. Unlimited
- B. \$0.618/CHF
- C. \$0.625/CHF
- D. \$0.007/CHF

18. What is the breakeven price for the writer of the put option?

- A. \$0.625/CHF
- B. \$0.618/CHF
- C. \$0.632/CHF
- D. \$0.600/CHF

19. According to the international Fisher Effect, if an investor purchases a five-year U.S. bond that has an annual interest rate of 5% rather than a comparable British bond that has an annual interest rate of 6%, then the investor must be expecting the _____ to _____ at a rate of at least 1% per year over the next 5 years.

- A. British pound; revalue
- B. U.S. dollar; depreciate
- C. U.S. dollar; appreciate
- D. British pound; appreciate

20. Which of the following are differences between a currency futures contract and a forward contract?

- A. The futures contract is marked to market daily whereas the forward contract is only due to be settled at maturity.
- B. The counterparty to the futures participant is unknown with the clearinghouse stepping into each transaction whereas the forward contract participants are in direct contact setting the forward specifications.
- C. A single sales commission covers both the purchase and sale of a futures contract whereas there is no specific sales commission with a forward contract because banks earn a profit through the bid-ask spread.
- D. All of the above are true.

21. After spending a week in Hanoi, you receive a message from your friend in Seoul, South Korea. He has found a great deal on a flight ticket and invites you to join him in Busan for a short vacation. You have VND 50,000,000 left in your wallet, and you need to exchange your Vietnamese đồng (VND) for South Korean won (KRW). You check the following exchange rates:

Spot rate for the VND/USD cross rate: VND 24,500 = \$1

Spot rate for the KRW/USD cross rate: KRW 1,320 = \$1

If you exchange VND 50,000,000, how many South Korean won (KRW) will you receive?

- A. KRW 2,500,000
- B. KRW 2,550,000
- C. KRW 2,750,000
- D. KRW 2,694,000

22. A foreign currency _____ option gives the holder the right to _____ a foreign currency whereas a foreign currency _____ option gives the holder the right to _____ foreign currency.

- A. call, buy, put, sell
- B. call, sell, put, buy
- C. put, hold, call, release
- D. None of the above

23. The current U.S. dollar-yen spot rate is 125¥/\$. If the 90-day forward exchange rate is 127 ¥/\$ then the yen is selling at a per annum _____ of _____.

- A. discount; 6.30%
- B. discount; 1.57%
- C. premium; 1.57%
- D. premium; 6.30%

24. Masan Corp. has just signed a contract to sell seafood to AB fish, a French firm, for €1,250,000. The sale was made in June with payment due six months later in December. Because this is a sizable contract for the firm, and because the contract is in Euros rather than dollars, Masan is considering several hedging alternatives to reduce the exchange rate risk arising from the sale. To help the firm make a hedging decision you have gathered the following information.

- The spot exchange rate is \$1.1740/€
- The six month forward rate is \$1.1480/€
- Masan's cost of capital is 12% per annum
- The Euro zone 6-month borrowing rate is 7% per annum (or 3.5% for 6 months)

- The Euro zone 6-month lending rate is 5% per annum (or 2.5% for 6 months)
- The U.S. 6-month borrowing rate is 6% per annum (or 3% for 6 months)
- The U.S. 6-month lending rate is 4.5% per annum (or 2.25% for 6 months)
- December put options for €625,000; strike price \$1.18, premium price is 1.5%
- Masan's forecast for 6-month spot rates is \$1.19/€
- The budget rate, or the lowest acceptable sales price for this project, is \$1,425,000 or \$1.14/€

Masan chooses to hedge its transaction exposure in the forward market at the available forward rate. The payoff in 6 months will be _____.

- A. \$1,467,500
- B. \$1,125,000
- C. \$1,435,000
- D. \$1,425,000

25. Masan Corp. has just signed a contract to sell seafood to AB fish, a French firm, for €1,250,000. The sale was made in June with payment due six months later in December. Because this is a sizable contract for the firm, and because the contract is in Euros rather than dollars, Masan is considering several hedging alternatives to reduce the exchange rate risk arising from the sale. To help the firm make a hedging decision you have gathered the following information.

- The spot exchange rate is \$1.1740/€
- The six month forward rate is \$1.1480/€
- Masan's cost of capital is 12% per annum
- The Euro zone 6-month borrowing rate is 7% per annum (or 3.5% for 6 months)
- The Euro zone 6-month lending rate is 5% per annum (or 2.5% for 6 months)

- The U.S. 6-month borrowing rate is 6% per annum (or 3% for 6 months)
- The U.S. 6-month lending rate is 4.5% per annum (or 2.25% for 6 months)
- December put options for €625,000; strike price \$1.18, premium price is 1.5%
- Masan's forecast for 6-month spot rates is \$1.19/€
- The budget rate, or the lowest acceptable sales price for this project, is \$1,425,000 or \$1.14/€

What is the cost of a put option hedge for Masan's Euro receivable contract? (Note: Calculate the cost in future value dollars and assume the firm's cost of capital as the appropriate interest rate for calculating future values.)

- A. \$23,333
- B. \$22,013
- C. €23,333
- D. none of the above

26. Assuming no transaction costs (i.e., hedging is 'free'), hedging currency exposures should _____ the variability of expected cash flows to a firm and at the same time, the expected value of the cash flows should _____.

- A. increase; not change
- B. decrease; not change
- C. not change; increase
- D. not change; not change

27. Pin Pham is a currency trader for a hedge fund specializing in foreign exchange (FX) derivatives. He expects the Canadian dollar (CAD) to depreciate against the U.S. dollar (USD) over the next three months. The current spot rate is 1.30 CAD/USD, and he has the choice between the following futures contracts:

Contract time	Settlement Price	Margin Requirement
Long CAD/USD Futures	1.32 CAD/USD	\$1,500 per contract
Short CAD/USD Futures	1.32 CAD/USD	\$1,500 per contract

If the spot rate at the end of three months is 1.38 CAD/USD, what is Jackson's total gross profit from one short futures contract?

- A. C\$6,000
- B. C\$5,000
- C. C\$10,000
- D. C\$1,500

28. Pin Pham is a currency trader for a hedge fund specializing in foreign exchange (FX) derivatives. He expects the Canadian dollar (CAD) to depreciate against the U.S. dollar (USD) over the next three months. The current spot rate is 1.30 CAD/USD, and he has the choice between the following futures contracts:

Contract time	Settlement Price	Margin Requirement
Long CAD/USD Futures	1.32 CAD/USD	\$1,500 per contract
Short CAD/USD Futures	1.32 CAD/USD	\$1,500 per contract

If Pin Pham expects the Canadian dollar to depreciate against the U.S. dollar, which position should he take in the futures market?

- A. Go long on CAD/USD futures
- B. Go short on CAD/USD futures
- C. Trade both long and short to hedge risks
- D. Do nothing since the futures price is fixed

29. Assume the current U.S. dollar-British spot rate is 0.6993£/\$. If the current nominal one-year interest rate in the U.S. is 5% and the comparable rate in Britain is 6%, what is the approximate forward exchange rate for 360 days?

- A. £1.42/\$

B. £0.7060/\$

C. £1.43/\$

D. £0.6993/\$

30. After spending a week in Hanoi, you receive a message from your friend in Seoul, South Korea. He has found a great deal on a flight ticket and invites you to join him in Busan for a short vacation. You have VND 50,000,000 left in your wallet, and you need to exchange your Vietnamese đồng (VND) for South Korean won (KRW). You check the following exchange rates:

Spot rate for the VND/USD cross rate: VND 24,500 = \$1

Spot rate for the KRW/USD cross rate: KRW 1,320 = \$1

If the South Korean won depreciates, and the new KRW/USD rate is 1,400, how will this affect the KRW/VND cross rate?

A. It remains the same

B. It decreases

C. It increases

D. Not enough information

31. After spending a week in Hanoi, you receive a message from your friend in Seoul, South Korea. He has found a great deal on a flight ticket and invites you to join him in Busan for a short vacation. You have VND 50,000,000 left in your wallet, and you need to exchange your Vietnamese đồng (VND) for South Korean won (KRW). You check the following exchange rates:

Spot rate for the VND/USD cross rate: VND 24,500 = \$1

Spot rate for the KRW/USD cross rate: KRW 1,320 = \$1

If the Vietnamese đồng appreciates and the new VND/USD rate is 23,800, what happens to the KRW/VND cross rate?

A. It increases

- B. It decreases
- C. It remains the same
- D. Not enough information

32. A foreign currency _____ contract calls for the future delivery of a standard amount of foreign exchange at a fixed time, place, and price.

A. futures

- B. forward
- C. option
- D. swap

33. Balance of payment (BOP) data may be important for any of the following reasons:

- A. BOP data helps to forecast a country's market potential, especially in the short run.
- B. the BOP is an important indicator of a country's foreign exchange rate.
- C. changes in a country's BOP may signal a change in controls over payment of dividends and interest.

D. all of the choices provided above

34. Of the following, which is NOT a part of J-Curve adjustment path?

- A. the currency contract period
- B. the quantity adjustment period
- C. the exchange rate pass-through period

D. Each of the above is part of the J-Curve adjustment path.

35. A country experiencing a serious BOT _____ is more likely to _____ exports than otherwise.

- A. surplus; contract
- B. surplus; expand
- C. deficit; expand
- D. none of the above
